

It is cheaper to pay two cents a week for the BIG SANDY NEWS than to borrow it from your neighbor. If you haven't tried this plan, send in a dollar and have it delivered to you for a year.

# BIG SANDY NEWS.

*Aut inveniam viam, aut faciam,*

LOUISA, LAWRENCE COUNTY, KENTUCKY, AUGUST 11, 1905.

VOL. XX NO. 49.

## THE NEWS OF THE WEEK. A Daily Resume of Important Happenings.

In a quarrel over an alleged debt, Felix Hoskins, a wealthy lumber merchant, of Leslie county, was shot to death by his first cousin, Nick Garrison, also a lumberman. Garrison fled to the mountains, where he is being hunted by a posse.

Sergius Witte, Russia's ranking envoy to the peace conference, arrived in New York yesterday and was greeted with cheers from a large crowd as he descended from the gang plank at the steamships dock. In an interview Mr. Witte asserted that he was favorable to peace. While peace, however, was desirable to Russia, he said, it was not indispensable. He spoke in high praise of the valor of the Japanese.

Secretary Wilson has authorized a statement regarding the charge that his son and private secretary had made a trip to Alaska, the expenses of which had been paid by the Government. The secretary admits the facts, but states that the trip was for the purpose of making certain investigations into the killing of game by hunters, and that his son was a paid employee of the department, traveling on official business.

At an informal meeting of a number of insurance commissioners from Western and Southern States, including Kentucky and Tennessee, it was determined to conduct an independent investigation of the affairs of the three big life insurance companies for the purpose of determining whether they are entitled to the confidence of the people. A meeting of the commissioners will be held in New York on August 10 to arrange a programme of work.

Mrs. Esther Damon, of Vermont, at the age of ninety-one, enjoys the distinction of being the last surviving widow of the War of the Revolution, which ended 122 years ago. She was born August 1, 1815, nearly a year before the battle of Waterloo. But the war which she draws a pension was ended thirty-one years before she was born.

A reunion of all soldiers, Federal, Confederate or veterans of the Spanish-American War, will be held at the Big Hill, three miles from Owensville, August 21, September 1 and 2. A number of prominent speakers will attend.

The strike order of the telegraphers' union on the Great Northern and Northern Pacific railways has been generally obeyed. Hundreds of operators have gone out on both lines, necessitating the closing of scores of stations and causing great hindrance in moving trains. Freight matter in less than car-load lots is being refused at Minneapolis and St. Paul. The railway officials say they will have enough men in ten days to fill the places of the strikers and maintain a normal service.

Gov. Blanchard, of Louisiana, has ordered boats armed with rapid fire guns dispatched to Lake Borgne to protect the rights of citizens of Louisiana against aggression by Mississippi quarantine patrols. A report made by the officers sent for that purpose confirms the capture and marooning of boats belonging to Louisiana fishermen. Gov. Vandam, in an interview, says that talk of conflict between the States is ridiculous, but a more serious view of the situation seems to be taken at New Orleans.

In a pistol duel near the Virginia line, between Berry Henesley and Mose Middleton, Jr., the latter was instantly killed.

Assistant Postmaster John Ballard, of Richmond, was arrested yesterday on the charge of receiving registered letters. Secret service men have been working on the case for some time.

A unique raid on gamblers was attempted by the Chicago police which ended in the escape of most of those threatened with arrest after a hot chase on the waters of Lake Michigan. Those whose arrest was contemplated were the frequenters of the floating pool room known as the City of Traverse. Most of the gamblers were in a swift boat than that at the command of the police and were first past the line that separates the waters of Illinois from those of Indiana.

Although there is a decrease in fatalities from yellow fever in New Orleans, there is a considerable increase in the number of new cases. The authorities, however, still feel confident in their ability to cope with the plague. It was decided that a thorough campaign of city cleaning would have a fine moral effect, though the doctors do not believe that it will have any direct influence upon the disease. The fact that the center of infection has been the poorest class of Italian residents seems to prove a powerful deterrent to immigration, a movement which employers of labor in the South have recently been disposed greatly to encourage.

Four men are in jail at West Liberty, Ky., charged with an aggravated criminal assault or series of assaults, on two young girls. Officers are searching for the fifth man, who is said to be implicated.

Manila's welcome to Secretary Taft and his party exceeded all previous

demonstrations of the kind in that city. Another great popular demonstration and parade will take place on Monday.

In a written opinion delivered by Attorney General Hays, it is held that Revenue Agents in instituting suits for back taxes, must employ the County Attorney of the county in which the action is instituted.

The President has approved the sentence of the court-martial in the case of Lieut. Marion B. Wilhoit, formerly of Kentucky, who was dismissed from the army for duplication of pay accounts at Jackson Barracks, La.

At a meeting of Pulaski county Republicans, at Somerset, resolutions were passed recommending not only the resignation of R. P. Ernst as chairman of the State Central Committee, but also his expulsion from the party.

Meetings of barley tobacco growers were held in twenty Kentucky towns and counties to discuss the organization plan of the Barley Tobacco Growers' Association. The capital stock of the proposed concern was originally fixed at \$2,500,000, but it is now said that this may be increased to \$7,500,000.

Consul General Rodgers reports to the State Department from Shanghai that the Chinese Chamber of Commerce of American goods and is anxious that it be abrogated. It is said that this same Chamber of Commerce was most active in starting the movement.

Attorney General Moody Saturday telegraphed the District Attorneys at points on the Great Northern and Northern Pacific railways asking them to investigate the facts as to interruption of telegraph service by reason of the telegraphers' strike, and to make full reports to the Department of Justice.

At a meeting of the Republican County Committee of Fayette county formal notice was given the Republicans party by the colored members of the committee that unless negroes were given equal prominence on the ticket selected to oppose the Democratic nominees there would be a split in the party, the negroes going over to the opposition.

A man, said to have been intoxicated, shot and killed a passenger on the Alton train as it was crossing the Mississippi river at Louisiana, Mo., Saturday. He then proceeded to hold up another passenger, and shot at random in the car, wounding a woman. He was overpowered by the passengers and placed in jail at Louisiana. He refused to give his name or state where he was from.

The fact that the Federal health authorities will take hold of the yellow fever situation had a good moral effect at New Orleans, and conditions for that reason are considerably improved. There was an extension of the infection, however, fifteen new centers, or foci, having been discovered Saturday. Among the new cases developed is that of Archbishop Chapelle, who has been much in the infected region. Memphis has declared an absolute quarantine against all persons, whether from infected regions or not. Railroad communication with Shreveport is entirely shut off.

President Roosevelt Saturday received the Russian and Japanese peace envoys on board the Mayflower at Oyster Bay. The plenipotentiaries were introduced to each other by the President, and afterward were entertained at luncheon, using the luncheon the President offered the following toast: "I drink to the welfare and prosperity of the sovereigns and people of the two great nations whose representatives have met one another on this ship. It is my most earnest hope and prayer, in the interest not only of these two great Powers, but of all mankind, that a just and lasting peace may speedily be concluded between them."

Secretary Taft and party have arrived at Manila. Their arrival was made the occasion of a gorgeous water pageant. Gov. Gen. Wright, Maj. Gen. Corbin and Rear Admiral Train, with their staffs and the official Reception Committee, met the party when the Manchuria anchored.

Insurance Commissioner Henry R. Prewitt will leave Wednesday for New York, where, acting in conjunction with commissioners from other States, a thorough investigation into the affairs of three big life insurance companies will be made.

At a meeting at a Cotton Exchange in New Orleans Friday it was decided by the health authorities and business interests of the city to request the Federal Government to take full charge of the fight against the epidemic of yellow fever; and acting under instructions from the meeting, Gov. Blanchard wired the President to that effect. The President at once instructed Surgeon General Wynn, of the Public Health and Marine Hospital Service, to do everything possible to comply with the request from New Orleans and to make a prompt report on the subject.

### Kentucky's Corn.

Corn is King in Kentucky this year and the harvest of this important crop promises to exceed by hundreds of thousands of bushels the yield of any other year. The crop is now practically safe with the exception of some every late planting. Throughout the State in bottom and on hillside, in the rich valleys and on the poor fields, such luxuriant growth was never before seen. One of the most beneficial things in connection with the crop is that the farmer on poor land, who usually has a scanty crop and sometimes nothing at all, will share this season with the rich farmer the great blessings of rain and sunshine that have made Kentucky a veritable Goshen. Thousands of farmers who are usually fortunate in raising ten bushels of corn to the acre will have thirty and forty and more corn in many cases than there is place to store it. While Kentucky produces ninety-five per cent of the hemp and over half of the tobacco of the United States and is also a fine wheat producing State, corn is the crop which is most universally raised. Every farmer is a corn-producer and a big crop of this staple means prosperity to more people than anything else that is produced out of mother earth. Corn is the principal food product for both man and beast. It is to the farmer what sugar is to the grocer, the great leading staple. The abundant corn crop this year will help the people who work the poorest land to make him feel the necessity of a bank account. It will pay off his little debts. It will enable him to provide his family with many of those creature comforts which his more fortunate neighbor has long enjoyed and which he and his good wife have so often longed for. He will be able to keep his work stock fat and sleek this winter and to sell a steer or two and a bunch of fat hogs.

We rejoice in the goodness of God who showers his blessings, like the gentle rain from Heaven both upon the just and unjust. We especially rejoice that He has put gladness in the hearts of the poor and has put joy and sunshine in the log cabins as well as the brick mansions with His bountiful providence.

We are going to have to use a western expression "a bumper crop," and while the corn cribs overflow with the harvest hearts will rejoice and be exceedingly glad.

G. B. BURHANS TESTIFIES AFTER FOUR YEARS.

G. B. Burhans, of Carlisle Center, N. Y., writes: "About four years ago I wrote you stating that I had been entirely cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick dust sediment and pain and symptoms of kidney disease disappeared. I am glad to say that I haven't had a return of any of these systems during the four years that have elapsed and I am evidently cured, and heartily recommend Foley's Kidney Cure to any one suffering from kidney and bladder trouble." Sold by Louisa Drug Co.

### At Hogwallow.

(From the Hogwallow Kentuckyman.)

Brother Enick Oliver preacher a sermon at the Hog Ford church last Sunday that fairly raised the roof. He also raised eight cents.

Sim Flinders, who assisted the neighbors to bury his second wife a couple of months ago has bought a new pair of britches and some new galuses, and says if sufficiently urged and properly approached he will get married again.

Salem Barlow was caught while getting away with two sides of meat and a hawk liver from our cousin, Nat Bott's smokehouse Wednesday night. The matter was hushed up at Salem to our hustling constable.

Last week while Bud Henstep was trying to swap his shotgun, it went off and killed a fellow by the name of Pete Somebody, who lives some where near Tickville. No ill feeling exists between the families as Bud didn't know the gun was loaded.

Miss Hostetter Hooks is laid up this week from being bit by a hawk last Sunday. She was to have eloped with Jim Henry Rasmus but Jim's mole jumped the fence the night before and got foundered at a straw stack.

Richard Henstep got drunk Thursday and rode his mule off of the Gander creek bridge. The creek was up and him and the mule stayed together. They floated on down and took breakfast with Brother Enick Oliver.

Sim Flinders is hustling about these days selling his new patent goose yoke. It is constructed on the same plan as the calf maul the editor invented last summer.

### THE ONLY WAY.

There is no way to maintain the health and strength of mind and body except by nourishment. There is no way to nourish except through the stomach must be kept healthy, pure and sweet or the strength will let down the disease will set up. No appetite, loss of strength, nervousness, headache, constipation, bad breath, sour risings, rifting, indigestion, dyspepsia and all stomach troubles that are curable are quickly cured by the use of Kodoi Dyspepsia Cure. Kodoi digests what you eat and strengthens the whole digestive apparatus. Sold by Louisa Drug Co.

### THE MOSQUITO.

#### An Ounce of Prevention.

It having been clearly demonstrated beyond all question that the mosquito is actively pernicious, as an agent in the promotion of malarial fever, besides being very annoying otherwise a few simple and practical instructions for the extermination of the pests may be valuable. As usual, the feminine is at the bottom of our troubles, and it's the female mosquito which must bear the burden of guilt now. If you are getting nightly serenades from the little minstrel which sings its song and immediately presents it bill, look within six hundred yards of home and you will find her laying eggs in some of these places:

"In some place of standing water;  
"In a cesspool;  
"A sewer inlet;  
"A rain water barrel;  
"A horse trough;  
"A roof gutter that is clogged;  
"An empty bottle;  
"An old tin can;  
"Broken crockery that holds water;  
"A water pan for dog, cat or chicken;

"A water receptacle for a grindstone;  
"A hole in a tree;  
"A watering pan for birds;  
"A garden fountain;  
"Any place, in fact, where water stands for five days or more. One tomato can in a shady spot, with water in it, has been found to breed sufficient mosquitoes to keep a family unhappy all summer."

The following advice is given for preventing the propagation as mosquitoes when such conditions exist:  
"Clean out every place where water stands.  
"So dispose of old tin cans, bottles or what not that rain cannot possibly be retained.  
"Watch your roof gutters.  
"Empty your rain barrel of water every week or screen it closely with fine-meshed wire on top.  
"Change the water every day in a drinking pan for dog, cat or bird.  
"Watch the watering trough near your stable.  
"Fill a hole in a tree with soil packed tight or with cement.  
"In other words, get rid of, or coat with kerosene, all stagnant standing water, and you will get rid of mosquitoes."

"If you have a playing fountain, put little fish, like minnows or goldfish, in the water and they will eat the mosquito larvae.  
"If you have a sluggish brook or a stagnant pond near your house spray kerosene or coal oil on the surface; this makes it impossible for the 'wigglers' to breathe when they come to the surface, and they die. The coal oil application is only necessary at the edges and is good only so long as the oil film is unbroken.  
These remedies are all simple and practical. The application of them entails some trouble, but it is slight compared to the good results which will follow, both as to comfort and health. If some energetic person in each neighborhood would inaugurate the work and encourage his neighbors to unite with him in it, the movement would soon take an organized shape and prove effective in its results."

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio.  
Sold by druggists, 75c.  
Take Hall's Family Pills for constipation.

### Special Clubbing Offer.

An arrangement has been made by the NEWS by which, for a limited time, we can furnish the Cincinnati Weekly Enquirer and this paper one year for \$1.50. Those wanting to take advantage of this offer should do so as soon as possible, as we do not know how long the arrangement will last.

The weekly Courier-Journal will also be furnished at the same price. Also, we will furnish the Daily Cincinnati Post and the Big Sandy News, both one year, for \$2.50.

### WASTING AWAY.

"I had been troubled with kidney disease for the last five years," writes Robert R. Watts, of Salem, Mo. "I lost flesh and never felt well and doctored with leading physicians and tried all remedies suggested without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now sound and well." During the summer kidney irregularities are often caused by excessive drinking or being overheat. Attend to the kidneys at once by using Foley's Kidney Cure. Sold by Louisa Drug Co.

### A Leaf From Kentucky History.

(Written for The Kentucky Farmer and Breeder by John Goff, Esq., Goff Home Farm, Indian Fields, Ky.)

The first woman to own a piece of land in Kentucky was Susannah Boone, daughter of Daniel Boone, who very early obtained a patent for a tract in Madison county.

The first marriage in Kentucky was that of Samuel Henderson to Elizabeth Callaway, August 7, 1776. Their daughter, Fannie, born in 1777, was the first white child in the State born of parents married in the State.

The first plow stock manufactured in Kentucky was made by William Poague, at Harrodsburg, in 1770. He also made the first loom, while his wife brought the first spinning wheel to the State and wove from the lint of nettles the first piece of linen manufactured, and from buffalo wool the first piece of linsey.

The first grist mill in the State run by water power was, perhaps, one built by Capt. John McMurtry, near Shakerstown, in Mercer county, in 1772.

The first paper mill in Kentucky was erected by Elijah Craig, near Georgetown, 1792.

The first apple seeds were planted in Mercer county by members of the McAfee Company in 1778. Dr. Walker and his companions planted the first peach seeds and raised the first crop of corn cultivated by white men near Barboursville in 1780.

The first wagon of which history gives an account was run over Smith's wagon road from Lexington to Mayville in 1783 by a man named Smith.

The first steamboat, or model of one, in the world was constructed by John Fitch at Lexington in 1785.

The first railroad—about one mile in length—was built by James A. Sikes and Jacob Van Meter in 1832. The cars were drawn by horses.

The first horses were brought to the State in 1750 by Dr. Walker; the first cattle and hogs by Boone and his companions in 1775.

The first lawyer in Kentucky was John Williams, manager of the Transylvania Company.

The first Englishmen who visited Kentucky were those under the leadership of Col. Wood, who, in 1654, explored the northern boundary in the State.

The first Frenchmen to view any portion of the State were a small band of fur traders, who, in 1673, traveled in canoes down the Mississippi as far as the mouth of the Arkansas.

The first settlement of Frenchmen in the State was established at a point opposite the mouth of the Scioto River in 1730.

The first house built by Englishmen was Dr. Walker's cabin on Cumberland River in 1750.

The first permanent English settlement was at Harrodsburg in 1775.

The first court in the State was held at Harrodsburg in 1777.

The first road in the State was Boone's trace.

The first store in Kentucky was that of the Transylvania Company at Harrodsburg.

The first school at Boonesboro was taught by Joseph Doniphan in 1779.

The first white native American to visit Kentucky was John Salling, of Virginia, who, in 1730 was carried as a prisoner by the Indians through the State.

The first white woman that ever saw Kentucky was Mrs. Mary Ingle, who, in 1656, was carried as a prisoner by the Indians to Big Bone Lick, in Boone county.

The first Dutchmen to visit Kentucky were a small company which established the White Oak Settlement in Madison county.

The first sermon preached in Kentucky was delivered by Rev. John Lybie, of the Church of England, in 1775.

The first ferry was established at Boonesboro in 1775.

The first county seat in Kentucky was that of Lincoln county, established at Harrodsburg.

The first law for the establishment of the public schools was passed in 1835.

### USE ALLEN'S FOOT-EASE.

A powder to be shaken into the shoes. Your feet feel swollen, nervous and damp, and get tired easily. If you have smarting feet or tight shoes, try Allen's Foot-Ease. It cools the feet and makes walking easy. Cures swollen, sweating feet, blisters and callous spots. Relieves corns and bunions of all pain. Try it today. Sold by druggists and shoe stores for 25c. Don't accept any substitutes. Trial package FREE. Address, Allen & Olinsted, Le Roy, N. Y.

### PROGRAM

For Children's Day at Baker Sunday School, Aug. 20, 1905:  
Devotional exercises.  
Welcome address, by M. F. Jordan.  
Response, L. R. Giles.  
Song by choir.  
Object of Children's Day by Isaac Cunningham.  
Song.  
Sunday School address by A. Harmon.

"Why study the Bible," J. H. Frazer.  
Recitations by Sunday School children.  
Song.  
Should parents attend Sunday School with their children, H. S. Dean.  
How to interest children in Sunday School, Dr. J. C. Hall.

What incentives to use in Sunday School, J. A. Billups.  
Candy treat.  
Closing song, "God be with you 'till we meet again." Committee.

### STOMACH CATARRH.

From Maine To Florida Pe-ru-na's Fame Has Spread.

Gottfried Hemmerich, of Palmer, Fla., says the following in regard to Pe-ru-na for catarrh of the stomach:

"My trouble was catarrh of the stomach, and your medicine has performed a miracle in my case, as the doctor I consulted said I could not live if I stayed in Florida. He wanted to send me to a hospital in Knoxville, Tenn. If I had done this I would surely have died. I took Pe-ru-na and now again I have life and energy, and new flesh and blood has replaced what I lost."  
Hon. J. D. Botkin, Congressman-at-large from Kansas, says: "A few bottles of your medicine have given me almost complete relief from catarrh of the stomach, with which I have been afflicted more or less for a quarter of a century." Address Dr. Hartman, Columbus, Ohio, for free book.

### Nasal CATARRH

In all its stages there should be cleanliness.  
Ely's Cream Balm cleanses, soothes and heals the diseased membrane. It cures catarrh and does away with all the head quickly.  
Cream Balm is placed into the nostrils, spreads over the membrane and is absorbed. Relief is immediate and a cure follows. It is not drying—does not produce sneezing. Large Size, 50 cents at Druggists or by mail; Trial Size, 10 cents by mail.  
E. V. BROTHERS, 50 Warren Street, New York.

### ELY VIRGINIA COLLEGE

For YOUNG LADIES, Roanoke, Virginia.  
Opens Sept. 25, 1905. One of the leading schools for Young Ladies in the South. New buildings, pianos and equipment. Campus tenacres. Grand mountain scenery in Valley of Virginia, famed for health. European and American teachers. Full course. Conservatory advantages in Art, Music and Education. Certificates Wellesley. Students from 30 States. For catalogue address

MATTHEW P. HARRIS, President, Roanoke, Va.

### The "Peachereno."

A boy stands on the street corners smoking cigarettes, using slang, becoming an adept in the finesse of polite swearing, making remarks about all the women that go by, and telling exactly where old Tom Smith misses it in the management of his business affairs. He does on the appellations "June-sweater," "tough" and peachereno applied to him throughout the community. His conduct is connived at by the witless girls of the town on the road to God knows where, he is dubbed "The proper stuff" by his associates, while the younger prodigals look upon his reputation as a consummation devoutly to be wished. After a little there is an opening in the firm Stoddard & Stoddard for a promising boy, offering a good salary to start on. But our young peachereno doesn't get it. No sir, he doesn't get it; and he can't understand why he, of all the young men in the vicinity round about, should not have been approached with that proposition at least three days before anybody else was thought of. Why, he can roll a cigarette quicker and spit through his teeth more approvingly, he can brogue out his oaths with a higher degree of stiffness, he can tell a vulgar yarn with greater gusto, he can sulk around to more strange places and escape unseen, he can drink more booze and walk straighter, he can have more wayward boys hanging on his heels, give more free advice and tell you more assuredly wherein the whole world is making a fool of itself, than any other young man in a radius of ten miles. And how many business houses with a position to let could overlook him is more than his little head can comprehend.

Wretched, wry-headed incapacity, with distorted conceptions of life! What hath a business house to do with thee? or why should a respectable institution of whatever nature covet thy presence?

Boys, the business men of your town know you better than your own parents do. Their eyes are on you when you are least aware. You may slip away from your old mother who sits busy with her knitting, you may dupe and deceive your best friends, you may elude the watchful eye of your teacher, you may trifle with the confidence of your Sunday School Superintendent, but you can't fool the business men of your town when they have a position to be filled.—Elmhurst, N.Y.

**NEWS**

**Bishop Hargrove, of the M. E. Church, South, died at his home in Nashville Thursday. He was 76 years old and had been a Confederate Chaplain.**

The niceties of the English language are certainly understood over in Elliott. One of the useful corps of country correspondents writes that "while Jake Smith is not exactly on the sick list he is puny around."

Washington, Aug. 5.—Miss Corinne Blackburn, daughter of Senator Blackburn, of Kentucky, and Mr. W. H. Gale, of New York and Leesburg, Va., were married to-day in this city in the presence of a small party of relatives and personal friends.

West Liberty, Ky., Aug. 5.—The Democratic Primary today of the Ninety-first legislative district was very quiet. Wolfe county gave H. M. Cox about 300 majority and Morgan about 250 majority. Cox is nominated and Paynter endorsed for United States Senator.

The late Bishop Hargrove, of the Southern Methodist Church, must have felt the shadow cast by coming events, for when he preached his last sermon on the 24th of April, 1904, he took for his text, "For we know that if our earthly house of this tabernacle were dissolved, we have a building of God, a house not made with hands, eternal in the heavens."

The contract for the construction of the new Kentucky capitol was awarded by the State Commissioner at Frankfort Tuesday, to the General Supply and Construction Company, of New York. The contract price is \$880,000 and a bond of \$225,000 is to be executed for the completion of the work within two years from the date the contract is signed. The building is to be of stone from the Bedford, Ind., quarries, with a base of granite.

By order of court, Special Commissioner L. B. Handley will sell the Abraham Lincoln birth place, near Hodgenville, to the highest bidder, on August 28.

This farm is sold in the case of A. W. Linforth against David Crear, etc.

It will be a sale of national importance and will attract people from many of the other States, because of the interest attaching to the famous old farm.

In an interview with Senator J. Campbell Cantrell, he said: "The report that it is the intention of my father to resign from the appellate bench is without foundation or authority. Judge Cantrell is now at Hot Springs, and is much improved. He will probably remain there several weeks. There is necessarily a possibility that his health may not enable him to set at the next session of court, but his present state of health does not require him to even consider resigning."

The Treasury officials, we are told, are elated over the fact that the July deficit is less than \$14,000,000. This is \$3,000,000 less than the deficit of last July. The officials reason that on this basis July deficits will cease in five years more. But at the present rate the available cash for meeting those deficits will be exhausted before the expiration of five years. Perhaps the Treasury officials are hopeful of making a stake by putting salt on the tails of some of the birds to which so much money has been thrown the last few years.

Frankfort, Ky., Aug. 4.—A constitutional amendment proposing to change from the secret ballot to the viva voce system of voting will be submitted to the voters of Kentucky at the November election, as provided by an act of the last legislature. Secretary of State McChesney sent out the required official announcement to the Kentucky daily newspapers, and it is barely in time, for the law requires the official announcement to be made 90 days before election day. The question has not been discussed by the newspapers, but it is known that a large number of people favor a return to viva voce system of voting.

Calling a crowd of negroes around him on the public square at Burkesville, Town Marshal Ben W. Coleman read aloud to them the vagrancy act passed by the last Legislature, and gave them twenty-four hours to get to work. Following this was a general exodus of negroes to the four quarters of the earth, and as a consequence the population of Burkesville is greatly decreased. According to the last census report the colored population of Burkesville is 40 per cent. greater than the white population, and it is evident that such a surplus of negroes has greatly retarded the growth of the town.

This is all right as far as it goes. But why draw the color line in matters of this sort?

The investigation of the graft in the Department of Agriculture is but ultimate correction of such abuses in which all honest people look for the part of the evolutionary process to all the departments of the Government. It first cropped out in the Post-Office Department. When charges were first made of corruption then the Postmaster General treated them contemptuously and denounced them as "hot air," but in time developments were made by investigation which showed a scandalous condition in some of the bureaus for which several grafters are serving time in the penitentiary. The same exposure followed in the Interior Department in regard to land sales and graft in the Patent Office and Indian supply contracts. Now in course comes the Agricultural Department after indignant denials of the possibility of such condition. The end has not been reached. After Secretary Wilson's department has been purged of its uncleanness there will be others to be overhauled. But the process is so slow as to threaten a long sleep before corruption in all of them is unseated and punished.

—C. J.

**OUR NEIGHBORS.**

Prof. T. R. McCure, of Wayne, will instruct the Teachers' Institutes in Putnam and Clay counties.

Elam is the name of a new post-office in Morgan county and Leander C. Elam is postmaster.

We are glad to note that Mrs. M. B. Goble was able to be out driving Sunday, after a protracted illness.

The J. A. Ross Lumber Company, of Catlettsburg, Boyd county, has been incorporated. It has \$150,000 capital stock.

The Citizens' National Bank, of Paintsville, has gone into voluntary liquidation, its business being taken over by the Paintsville National Bank.

The residence of M. E. Eden, on Catletts creek, burned to the ground Friday night, and not a thing was saved—not even the family's clothing. The origin of the fire is unknown, but the loss is heavy and the inconvenience great. Mr. Eden owned his property, and it was insured for \$1,000.

Mt. Sterling, Ky., Aug. 4.—Much excitement was caused here to-day by the discovery of green oil in the city limits of Mt. Sterling. The oil was found in a well drilled four years ago by F. J. Craig and W. S. Reeves. The men went to remove the casing when they found the well filled up with green oil.

Word reached here Friday night that Mrs. W. S. Harkins, of Prestonsburg, took three grains of morphine by mistake last Thursday morning. Only the immediate attention of the physicians saved her. Mrs. Harkins has many friends in this city who will be glad to hear that she will recover.—Catlettsburg Press.

The Bank of West Liberty, at West Liberty, Morgan county, has closed its doors. The failure is said to be due to excessive loans. It is believed the failure is only temporary and that the institution will again open its doors. The capital of the bank is \$100,000, and the officers are W. D. Archibald, cashier; S. M. Cecil, president; and W. G. Blair, vice-president.

Congressman James A. Hughes left yesterday for Washington, where he will meet the Hon. C. M. Bowers, U. S. Fish Commissioner, and together the two will proceed to Boston, and thence to Portland, Maine; Montreal, Quebec, Canada; and from there to New York, through the White Mountains. They will be gone about two weeks. Mr. Hughes was accompanied by his wife and children.

Last Friday Captain William Crocker, proprietor of the Arlington Hotel, Huntington, was fatally injured about 10 o'clock in the morning at the Driving Park, he being stabbed over the heart and cut in other parts of the body by F. H. Burgen, manager of the Fair Association. His wounds, besides the heart stab, were thigh and leg. Three of Burgen's henchmen also assailed Crocker with kicks and blows with clubs and brass knuckles.

Inez, Ky., Aug. 8.—Morgan Curry, living on Tug river, ten miles north of here, was shot and probably mortally wounded by his brother-in-law, Kelley Prince. It is said a dispute arose over a game of cards and both men were trying to get pistols from their pockets. Prince was too quick for Curry, and shot him three times through the body.

Colonel Curry has been "mortally wounded" so often that this latest wound may be resolved with at least a shade of suspicion.

A grand reunion was held at the beautiful country home of Mr. and Mrs. John N. French, near Zella, Lawrence county, August 3rd, when Mr. and Mrs. French celebrated their 20th wedding anniversary. They have lived to rear twelve children (eight girls and four boys), all living but one. Mr. French is 50 years old, and Mrs. French is 71, and they are usually active old people, and still entertain hope of living a number of years yet. Mr. and Mrs. French have fifty grandchildren and twenty great-grandchildren, forty being present, and an elegant dinner was served on the beautiful lawn. Everybody enjoyed the affair to the utmost.

Huntington, W. Va., Aug. 4.—The Guyandotte Valley passenger train from Logan to this city had an accident to-day, killing three men, and injuring another. Frank Adams was struck by the train shortly after leaving Logan while crossing the track and instantly killed. A tramp was seriously injured. John Ashan, an aged farmer, of Barboursville, was killed as the train reached that point. He stood on the track directly in front of the train, thinking that it ran upon another track. While the engineer was returning to the roundhouse after arriving in this city George Zircle, who was walking on the track, was struck and instantly killed.

The question of a change of location for the court house of Wayne county, W. Va., being agitated, is brought up just now by the proposed erection of a new jail at Wayne. The rival towns think this an auspicious time to get in their work. A meeting of the City Council and prominent citizens, was held in Ceredo, one night last week, to discuss the matter, and Hoard Bro's of that place offered twenty-four lots in a tract of their land lying just west of the town, and bordering on the Camden car line; and \$2,000.00 in addition, as an inducement for the removal of the county seat to Ceredo. Kenova offers \$1,500, and Wayne will fight to the bitter end before it will be vanquished by the river towns.

**Weather Forecasts.**

The following will doubtless be interesting reading to many of our readers. The methods of forecasting the weather, now a science, almost are but little understood by the general public, and this information coming from an expert, may be considered reliable.

"Weather maps are like human faces," said District Forecaster F. J. Walz, glancing at the queer tangle of lines and figures which to his trained eye told all there was to tell about meteorological conditions over the entire country to-day.

"No two of them are just alike, and sometimes they are extremely dissimilar."

"No university in the world can teach its scholars how to read faces, and no amount of study can make a forecaster."

"The only place a man can learn to tell what the weather is going to be is in the school of experience."

"It is an established fact in the Weather Bureau that the best educated men in meteorology—those with the most highly specialized technical knowledge—are not the best forecasters."

"The distribution of areas of high and low pressure, is not the only thing to be considered in making a forecast—not by a long jump. To be successful you must, by long experience, know how those areas act at various times of the year. You must know, in a general way, the run of weather in different seasons."

"Every area of low pressure—that is, every storm area—in the United States travels in a certain general direction, depending on the point where it originates. Year after year these storms follow a series of tracks, not capricious, but related to one another by well defined laws. One can learn those laws by study, but he cannot learn how fast those storms will travel except by experience. Some of them cross the continent in two days, and some take six—the average is four. Now the man who can tell about how fast they will travel, and when they will reach the territory he makes the forecast for, loses out."

"Then making weather forecasts," ventured a listener, "is pretty much like an horseshoe."

"Well, it is not quite so uncertain as that," said the weather man, smiling. "But we do have to get inside information before we win."

"And you study the drape," persisted the listener.

"Yes, we have records which we must be familiar with. Storms take somewhat different directions in different months. By learning the rules governing them in a general way these long-range forecasters whose predictions figure so prominently in almanacs, are able to get in their work. Their prophecies cover the entire movement of a storm across the country, and the time is made so elastic that the wonder is they miss so often. They can't help but guess right once in a while, of course, but only ignorant people place any belief in them."

"Somebody has said that if he could write the songs of a country he wouldn't care who made the laws, and I suppose there is a good deal of sense in that. But if you will give me the meteorological records of a country, I can make a pretty close guess to the character of the people. Now, in the past ten years 121 storms have crossed the North American continent during the month of February. Every one of them developed in the West and moved in a general direction eastward and northward and all of them ended up in the New England States. That section of the country is the stormiest place in the world. The New England climate is bleak and rigorous, and the New England character is correspondingly stern. Down in the southern part of the country, where storms are infrequent and the sun shines the most of the time, the temperament of the people is genial, sunny, and somewhat indolent. Do you think that is only a coincidence?"

"Now, areas of high barometric pressure, usually denote fair weather. The barometer measures the weight of the atmosphere, you know. In the United States 'highs,' as we call them, travel generally from the northwest to the southwest part of this country. But that is a very vague way to put it. To go more into detail:

"A 'high' appearing on the California coast may cross the mountains near Salt Lake, and then pass directly over the belt of the Gulf States to the Florida coast; or it may move farther northward, cross the Rocky Mountains in the State of Washington, up the Columbia river valley, then turn east, and finally reach the Gulf of St. Lawrence. The paths are determined by the laws of the general circulation of the atmosphere and the configuration of the North American continent. This movement of the 'highs' from the middle Pacific coast to Florida or to the Gulf of St. Lawrence is confined to the summer half of the year—April to September, inclusive."

"In the winter months, on the other hand, the sources of the 'highs' is

## NEW BOOKS.

By order of the State Superintendent acting under the direction of the Attorney General the people must this year buy newly adopted books. Teachers using the old books can not draw any money for this work—the prices of the books are as follows:

Book	Retail Price	Exchange Price
The Modern Pronouncing Speller	12	12
McGuffey's Eclectic Primer	12	12
McGuffey's New First Reader	12	12
McGuffey's New Second Reader	12	12
McGuffey's New Third Reader	12	12
McGuffey's New Fourth Reader	12	12
McGuffey's New Fifth Reader	12	12
Ray's Modern Elementary Arithmetic	12	12
Ray's Modern Intellectual Arithmetic	12	12
Ray's Modern Practical Arithmetic	12	12
Long's New Language Exercises, Part I	12	12
Long's New Language Exercises, Part II	12	12
Harvey's New English Grammar for Schools	12	12
Maxwell & Smith's Writing in English	12	12
New Century Elementary Physiology	12	12
New Century Intermediate Physiology	12	12
Eclectic Primary History of U. S.	12	12
Eclectic History of U. S.	12	12
Kindred's of Kentucky	12	12
Peterman's Civil Government	12	12
Rational Writing Books, 50c per doz. or 5c each.	12	12

Old books published by the American Book Company will be taken in exchange for new ones of the same grade if they have the backs on. Fry's geographies and Lee's histories will be used in the Lawrence county schools for the fiscal year of 1905-6. These books are included in years ago, and the publishers naturally insist upon their use until that contract expires. All the other books adopted at this time are published by the American Book Company, which cancelled all previous contracts and caused the new general law of the State to be put into effect. Remember, you can not exchange a book of one grade for that of another. For instance, a first reader can not be exchanged for a second. It can only be applied toward the purchase of a new first reader.

"My Sons," said a great business man, "are my partners and they need all the strength and courage I can give them, and he forthwith paid for a \$1,000.00 policy in The Mutual Life Insurance Company of New York. Not without the most careful investigation, however, extending over six months. He was convinced by just such facts as led the President of a National Bank in New York to make the curious and shrewd provision in his will, which is contained in "A Banker's Will." Write for it and also for the account of the \$1,000.00 policy, "The Largest Annual Premiums."

This Company ranks First-In Assets First-In Amount Paid Policy-holders First-In Age.

THE MUTUAL LIFE INSURANCE COMPANY OF NEW YORK, RICHARD A. MCCURDY, President.

F. H. YATES, Dist. Man., Louisa, Ky.

## Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty and cheerfulness disappear where the kidneys are out of order or diseased.

Kidney trouble becomes so insidious that it is not un-
